

# Preventing Suicide in Adolescents

Recent child safeguarding practice reviews across the Tees area have highlighted the need for practitioners to gain an understanding of self harm/suicide of young people and the impact that adverse childhood experiences can have on a young person during their adolescent years.

**No matter what your profession, we all have a role to play!**

Our children and young people are relying on us to protect them from harmful situations during their childhood and support them through their teenage years.

The Safeguarding Children Partnerships across Tees have organised this in person **Preventing Suicide in Adolescents Event**

The main event will take place on 12th July 2022 (venue to be confirmed) and a number of webinars/workshops taking place in the days following on from the main event **(it is expected that attendees will attend the main event & 2 webinars/workshops)**
